Tequila
QUICK START GUIDE

Install

First of all, copy the files in the zip to your server.
To install the script, open the "install" folder with your browser and follow the guided process.

Update

To update the script, open the folder "update" from the browser and follow the guided process. No user files will be modified.

Sign Up

You must enter the required information in the fields to register. Once submitted, you will be redirected to the login page. Please note that the username must be longer than 5 characters, and if the user or password are already registered, you can not resubscribe.

Log in

Once you've registered, you can login with your username and password.

Forgot Password

To recover your password, enter your email in the "forgotpass.php" and receive an email with a new password. We recommend that you change it back after login.

Log out

To sign out, go with the mouse on the button at the top right with your username and then click on the "Logout" button.

File Manager

The first button in the sidebar to the right is used to create folders, the second is used to move files, the third is used to copy files and the fourth to delete files and folders. To select files and folders you want to move, copy or delete, click on the checkbox at the bottom right of the file-tile.
To upload files click on the button "Upload Files" on the right sidebar, or drag files to the zone. Once the file is successfully loaded, you can refresh the page and the file will appear as a tile.
To rename files and folders, click on the name of the tile and you will see an input. In the input enter the new name and hit enter.

Edit Account

To edit account, go with the mouse on the button at the top right with your username and then click on the "Settings" button. Now fill in all the information. Please note that you must fill in all fields.

Edit Settings/Admin Panel

To go in the admin panel just log in as administrator account and click on the button "Admin" in the header white.
